Forecast for Sunday 28 May 2023

Weather: Patchy cloud to start, along with some mist and fog patches possible in valleys. This breaking and clearing through the morning to warm sunshine, but feeling cooler on the tops with a brisk breeze developing.

Chance of cloud-free hill tops above 800m: 95% or greater.

Low Cloud and visibility: Cloud is expected to remain generally well above all summits, though some patchy early cloud perhaps as low as 300-400m is possible in the north of the range to start, this tending to lift and break quickly into the morning. Good to very good visibility likely at all heights, though isolated mist and fog patches early morning could limit visibility at low levels for a time but soon clearing where it occurs.

Valley	11/9	12/10	13/10	14/12	14/13	13/10	11/8
Freezing Level*	2000m	1700m	1500m	1600m	1800m	1800m	1800m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Strong sunshine with high UV levels and appropriate protection required. Despite the fine weather, warmer layers are advised for when on the tops and exposed to the breeze, with temperatures feeling significantly cooler in the wind.

Forecast for Monday 29 May 2023

Weather: Perhaps the odd patch of valley mist or fog during the morning. This soon clearing, however high cloud will thicken from the northeast through the morning. This will tend to break through the day, however any sunshine is likely to remain rather hazy. Remaining rather breezy, and feeling cooler.

Maximum wind: Easterly 15-20mph with gusts 25-35mph.

Chance of cloud-free hill tops above 800m: Near 100%.

Low Cloud and visibility: Cloud is expected to remain above all summits. Good to very good visibility likely at all heights.

Temperature: **Valleys:** Plus 6 Celsius rising to Plus 17 Celsius
At 800m: Plus 4 Celsius rising to Plus 10 Celsius
Freezing level: Above summits.
